EDUCATION & WORK EXPERIENCE

Youngstown State University - Youngstown, OH

I graduated from Youngstown State University May 2004 with a Bachelors Degree in Computer Science, minoring in Mathematics.

Computer Programmer/Analyst (9-2000 to Present) **AIM Leasing Inc – Girard, OH (6-1999 to Present)**

For the last 6 years, while attending Youngstown State University, I worked full time as a Computer Programmer at AIM Leasing, inc designing, developing, and maintaining business software that is used internally by our staff and sold to customers.

SKILLS AND DEVELOPEMENT BACKGROUND

Platforms –

Metaframe, Unix, AS400, Windows 95/98/2000/XP.

Languages –

6-8 Years Experience: Progress (4GL), C++, JAVA, Java Script, HTML, SQL

4+ Years Experience: Perl, XML

1+ Year Experience: RPG, Shell Script, VB6, VB.NET

In process of learning: ASP.NET

Developed –

Course Scheduler: Developed as a team in Software Engineering, using JAVA. This program was desgined for the Administration of YSU giving them a quick and easy way to assign professors and courses to rooms for each semester. I preformed duties of Database Administrator.

Advisor Pro: Developed as my Senior Project, using JAVA. Adviser Pro is a natural language program which allows the user to enter questions pertaining to classes offered and what classes the student has already taken. The Advisor parses through the student's query and responds intelligently.

Sales Gold: Developed for the Sales force at AIM Leasing, using Progress 4GL. Sales Gold keeps track of customers, prospects, appointments, equipment pricing, and even quotes deals. It also has an elaborate reporting section which analyses all of the data imputed into the system for Sales force efficacy and Commission earnings, and Lifetime earnings on deals.

Logistix Pro: Developed for the Sales force at AIM Leasing, using Progress 4GL. Logistix Pro keeps track of customers, carriers, loads dispatched, and freight bill auditing. Logistix Pro also has an elaborate reporting section which analyses the shippments and costs entered into the system and generates various reports showing cost per customer, cost per pound, and cost per mile.
